

ANNUAL ANNOUNCEMENT

OF THE

CINCINNATI COLLEGE

OF

Medicine and Surgery,

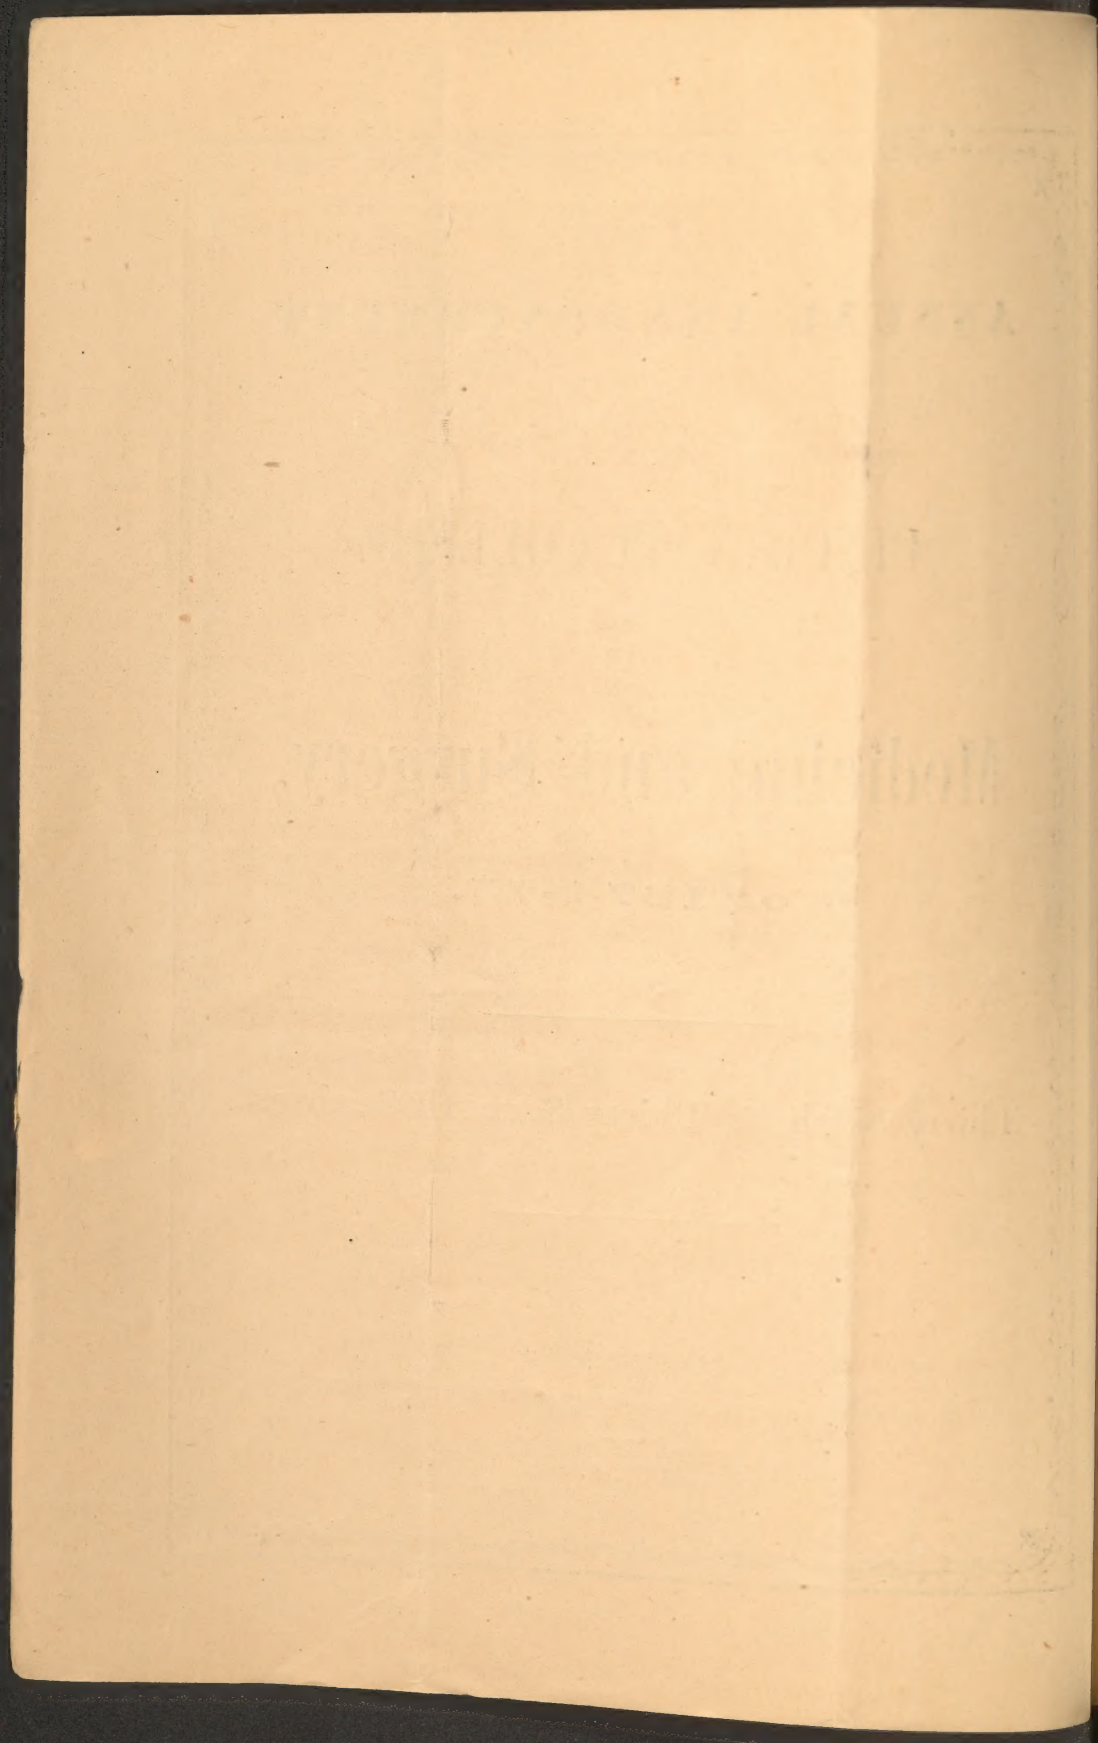

For 1874-75.

Thirty-Sixth & Thirty-Seventh Sessions.

CINCINNATI:

H. WATKIN, PRINTER, COR. FIFTH AND WALNUT STREETS.

1874.

Cincinnati College of Medicine & Surgery,

Annual Announcement for 1874-75.

The Thirty-Sixth & Thirty-Seventh Sessions,

BOARD OF TRUSTEES:

REV. F. S. HOYT, D. D., *President.* PROF. G. W. HARPER, A. M., *Sec'y.*

R. C. S. REED, M. D.

D. D. BRAMBLE, M. D.

A. J. MILES, M. D.

J. A. THACKER, M. D.

BISHOP J. W. WILEY, D. D.

CINCINNATI:

H. WATKIN, PRINTER, NORTH WEST CORNER FIFTH AND WALNUT STREETS.

1874.

Board of Council.

E. D. MANSFIELD, LL. D., Cincinnati.
HON. JOB. STEVENSON, Cincinnati,
REV. B. P. AYDELOTTE, D. D., Cincinnati.
HON. F. HASSAUREK, Cincinnati.
MAJOR C. H. BLACKBURN, Cincinnati.
HON. J. B. WARREN, Cincinnati.
HON. GEORGE E. STEARNS, Cincinnati.
A. B. JONES, M. D., Portsmouth.
R. R. McILVAINE, M. D., New York.
HON. CHARLES REEMELIN, Cincinnati.
W. A. BRAND, Kentucky.
R. STOWERS, Kentucky.
REV. I. M. WISE, Cincinnati.

FACULTY.

R. C. S. REED, M. D.	Jones' Station.
Professor of Materia Medica and Therapeutics.	
D. D. BRAMBLE, M. D.	169 Broadway, Cincinnati.
Professor of Surgery.	
A. J. MILES, M. D.	43 West Ninth Street, Cincinnati.
Professor of Diseases of Women and Children.	
J. A. THACKER, M. D.	N. W. Cor. Plum & Longworth Sts., Cincinnati.
Professor of Principles and Practice of Medicine.	
J. TRUSH, M. D.	83 East Fifth Street, Cincinnati.
Professor of Obstetrics.	
CHAUNCEY R. STUNTZ, M. D.	College Building, 164 George St. Cin'ti.
Professor of Chemistry.	
J. B. A. RISK, M. D.	Covington, Ky.
Professor of General Pathology.	
R. B. DAVY, M. D.	497 Freeman Street, Cincinnati.
Professor of Physiology.	
M. L. AMICK, M. D.	836 Central Avenue, Cincinnati.
Professor of Anatomy.	
J. W. UNDERHILL, M. D.	434 John Street, Cincinnati.
Lecturer on Medical Jurisprudence.	
L. P. MEREDITH, M. D., D. D. S.,	197 West Fourth Street, Cincinnati.
Lecturer on Dental Medicine and Surgery.	
M. B. GRAFF, M. D.	129 Dayton Street, Cincinnati.
Demonstrator of Anatomy.	
JULIUS E. MARCUS,	175 West Third Street, Cincinnati.
Prosecutor to Professor of Anatomy.	
J. A. THACKER, M. D., SEC'Y.	D. D. BRAMBLE, M. D., DEAN.
N. W. Cor. Plum and Longworth Sts.	169 Broadway, Cincinnati, O.
CONRAD STUMPMEYER, Janitor, College Building, 164 George Street.	

Annual Announcement.

For the year 1874 and 1875.

THE CINCINNATI COLLEGE OF MEDICINE AND SURGERY will hold the ensuing year the usual two-terms of Lectures. The Fall and Winter Course, or the *Thirty-sixth Course of Lectures*, will commence Thursday, October 1, 1874, and close the latter part of the following February. The Spring and Summer Course, or the *Thirty-seventh Course of Lectures*, will commence March 1, 1875, and continue until the last of the following June. A Preliminary Course will begin September 15, and continue until the commencement of the Regular Course.

In issuing their Annual Announcement for the ensuing year, the Trustees and Faculty are able to express the same gratification in the healthy condition of the school that they did last year. The two last sessions were prosperous, giving evidence of an undiminished confidence on the part of the profession, and may be regarded as an earnest of the future prosperity of the school.

The College occupies a new building on George street, between John and Smith streets, which for comfort and convenience, and general adaptation for all the purposes of a medical college, is unexcelled by any in the country. Centrally located, and convenient to boarding-houses, the Cincinnati Hospital, and street railroads, it is nevertheless situated on a quiet, pleasant street, removed from the noise and din of the busy city. A fine, large hall, furnished with comfortable chairs, occupies the whole of the third story. This hall is commended by all for its beauty. From its windows is had a fine view of nearly the whole city, and of Covington and Newport and the surrounding hills in Kentucky. A second lecture room, in the form of a fine, large amphitheater, occupies the whole of the ground floor, and is easy of access to students both from George street and a half-street in the rear. A most superb dissecting room is situated on a level with the second story. Besides two fine, large lecture rooms, a laboratory, well supplied with apparatus, there is a

large museum room, offices, etc., and rooms for the janitor to reside in. In fact, there is nothing wanting in any convenience for thorough medical instruction.

THE POLICY OF THE SCHOOL.

It is the policy of the Cincinnati College of Medicine and Surgery, and forms a distinguishing feature with it, to place the price of tuition at as low a rate as possible. It maintains, and it is believed that it will be sustained in its views by a right thinking community, that the true method to elevate the profession is to do away, as far as is consistent with the expense of proper teaching, with pecuniary obstacles in entering the profession; and to place at a high standard the attainments necessary for graduation. Want of wealth, then, will not prevent the poor man, eminently qualified, from competing for the honors of the profession, while the high qualifications required for graduation will deter both rich and poor alike unqualified from seeking after them.

The teacher should be compensated for his services, for the laborer is worthy of his hire. But will not low charges more surely bring about such a result, besides the great boon it is to the poor, struggling young man, than high rates? Large fees enable colleges to pay their expenses with but few students in attendance, and, consequently, a strong temptation is held out to establish medical schools in small cities and towns, where adequate clinical advantages, so essential to medical education, can not be had; while low fees discourage the founding of schools at points unfavorable for instruction, from the fact that with them such an amount of patronage is required to meet necessary expenses as only can be obtained in large cities, forming the centre of a large extent of country, and which alone possess all the facilities for thorough instruction. A low rate of fees, too, is in accordance with the generous spirit of our age and country, which is everywhere opening free libraries and lecture rooms, and building school houses for the million.

Those who insist, as many do, that medical college fees should be placed at a high rate, the same as urge that only those who are in affluent circumstances should be admitted into the profession. If talent be confined to the rich the demand would be reasonable; but who is willing to assert that it is? History undoubtedly shows that many of those, the most distinguished for learning, were not

only at the outset of moderate means, but, in many instances, were sufferers of abject poverty. Capacity for instruction and ability to discharge all the higher duties of life exist in every rank, as every intelligent man daily observes, and it is arrogant presumption to act as if it did not. Many high-born have been eminently gifted, but not a greater number than from among those who have supplied their wants by their toil. It is owing to this very fact that the free institutions of our country have permitted the sons of the poor to be educated, that many of those who are the most bitter opponents of low fees are in a position to urge their opposition. If it were not for the democratic institutions of the country, by which the former discriminations were abolished, these same opponents of low fees would probably be hewers of wood and drawers of water.

COURSE OF INSTRUCTION.

The course of instruction will be complete in all the branches of medicine. It will be the aim of the Faculty, both in the fall and winter term, and in the following spring and summer term, to render the course of instruction *eminently practical* and *demonstrative*, and to give the institution a *high rank* as a school of sound medical learning and practical acquirement. To this end it will be kept constantly in view, the importance of the student of being thoroughly instructed in the principles of medicine, and of being able to rightly apply them to the treatment of disease.

It will be the aim in the Chair of Principles and Practice to make the course full and complete, and all the student can desire. All means of illustration will be made use of.

By the Chair of Surgery the different surgical operations will be performed upon the cadaver; and no pains will be spared to make those desiring to cultivate surgery practical and accomplished surgeons.

In teaching *Materia Medica* and *Therapeutics*, it will be the object to make the student practically familiar with medicines, and to impart to him a thorough knowledge of their therapeutic properties. There is an extensive cabinet of drugs for illustration.

In the department of *Gynæcology*, which has become of so great importance to the everyday practitioner, it will be the aim to present the results of the investigations of the many eminent modern

cultivators of that branch of medicine, and, as far as it can be done by lectures and cases brought before the class, qualify the student for its practice.

The operations of Obstetrics will be as fully illustrated as possible. Prof. Trush, who has been transferred to this chair, and who has been filling it during the last two terms, will make use of the cadaver and the manikin in teaching artificial delivery by turning and by the use of instruments; and whatever other means may be necessary to make each student a skilful manipulator, will be used.

The means of illustration in Anatomy in this school are large, consisting of models, plates, and dried preparations. Besides the lectures, illustrated by dissections, the dissecting room is open nightly for dissecting by students under the direction of the demonstrator.

Prof. Davy will make his lectures upon Physiology as demonstrative as possible, and will not fail to draw attention to whatever can be made of practical use.

The Chair of Chemistry will continue to be occupied by Prof. C. R. Stuntz. Prof. Stuntz has been long engaged in teaching chemistry in one of the principal institutions of learning of Cincinnati. Students and friends of the school can feel assured that the instructions in chemistry will be all that can be desired.

PRELIMINARY COURSE.

As mentioned, there will be a Preliminary Course of Lectures commencing September 15th, and continuing to October 1st, the time when the fall and winter term begins. These Lectures will be free to all. Instructions will be given in special departments in medicine, which cannot be treated of in the regular course. Students should exert themselves to be present, as they will find it highly advantageous to them.

MEDICAL JURISPRUDENCE.

Dr. J. W. UNDERHILL will continue to give regular lectures on this interesting and important department of medical education. Dr. UNDERHILL was formerly the Coroner of Hamilton County, and

his qualifications are so well known that it is quite unnecessary to enlarge upon them.

PRACTICAL ANATOMY.

The most liberal provisions are made for the prosecution of this very important branch. The dissecting room will be open at the commencement of each term, and classes formed for immediate work. There will be found no difficulty in carrying on dissections during the spring and summer term, as the subjects are so prepared as to be easily preserved for thorough study.

Anatomical material is supplied in abundance, and at low rates.

The dissecting room is commodious, well lighted and well ventilated, and provided with every thing necessary for comfort and convenience.

CLINICAL LECTURES.

Clinical Lectures are delivered daily during the lecture terms, at the Cincinnati Hospital. The Cincinnati Hospital, which is managed by a Board of Trustees, and is in connection with no college, but is open for clinical instruction to the students of all colleges on the same terms, is the most magnificent institution of the kind in the United States, and, in fact, is second to none in the world. Here are found fever wards, ophthalmic wards, obstetrical wards, venereal wards, and surgical wards. In a word, the students may here enjoy the advantages of seeing all manner of diseases. The clinical material is far greater than any student can possibly have time to study.

At the close of the winter term, six house physicians are appointed for this Institution, and all undergraduates have an opportunity of competing for the position. At this time two students of the Cincinnati College of Medicine and Surgery are house physicians.

COLLEGE DISPENSARY.

There is connected with the College a Dispensary, which affords a large amount of clinical material. Cases of venereal diseases, of minor surgery, and diseases of interest and importance brought about by poverty, vice, etc., present themselves in large numbers,

and will be examined and prescribed for in the presence of the class. Advanced students will also be allotted cases to attend at their residences. Second course students can generally rely upon having the opportunity of attending one or more obstetrical cases during the term.

One or two students are chosen at the end of each term of Lectures to act as dispensary physicians for the ensuing year.

CABINET.

The collection of specimens, models and preparations, is large and varied, and affords ample means for illustration in anatomy and pathology.

Dry and wet preparations, models in plaster, obstetrical, anatomical and other plates, are in sufficient abundance for the most minutes study.

Among the curiosities to be found are foetal specimens of every month of uterine life; foetus without brain or spinal cord; foetus with double brain; a large impregnated uterus; foetus with complete hernia at the umbilicus of all the intestines; ovaries displaying Graeffian vesicles at every stage; horse-shoe kidney; four kidneys from one man; heart with ossified mitral valve; tape worms, one 105 feet long.

The Faculty have recently, at considerable expense, added very many preparations in wax, made expressly for them, representing every variety of venereal disease and of skin diseases.

TEXT BOOKS.

The Faculty would recommend each student having one or more of the text books here mentioned, in the different branches.

Principles and Practice.....	Roberts, Flint, Watson, Aitkin
Surgery.....	Ashurst, Erichsen, Druitt, Gross
Obstetrics	Bedford, Hodge
Diseases of Women.....	Hewitt, Barnes, Thomas
Diseases of Children.....	Meigs and Pepper, West, Smith
Materia Medica.....	Stille, U. S. Dispensatory
Physiology.....	Flint, Dalton, Marshall
Psychology and Diseases of the Nervous System.....	
.....	Maudsley, Hammond, Blandford

Anatomy.....	Gray, Heath, Cruvelhier, Holden's Manual
Forensic Medicine.....	Taylor, Elwell
Ophthalmology.....	Lawrence, Jones, Wells
Chemistry.....	Fowne, Brande and Taylor

REQUIREMENTS FOR GRADUATION.

The candidate must be twenty-one years of age, and must present proper testimonials of a good moral character, and satisfactory evidence that he has studied medicine for three years with a physician and surgeon duly authorized by law to practice his profession. He must have attended two full courses of lectures—the *last* of which must have been in this college. He must pass a satisfactory examination, and submit to the Faculty of the college an acceptable thesis on some subject connected with medicine, of his own composition.

Attendance upon at least one course of clinical instruction in some well organized Hospital is also required.

Four years' practice will be considered as equivalent to attendance on one course of lectures, a certificate of which must be presented at the time of matriculating, or handed in with the thesis.

FEES.

As stated, the Trustees and Faculty of the *Cincinnati College of Medicine and Surgery* hold that the price of tuition should be made as small as the expenses of teaching render practicable, and therefore have made the fees as low as possible. While they do not claim for their school especial advantages over other schools, they do claim that it possesses every facility necessary for the acquisition of knowledge, a position second to none in reputation, and due zeal for themselves in the cause of medical education.

Professor's Ticket.....	\$25 00
Matriculation.....	5 00
Demonstrator's Ticket.....	5 00
Hospital Ticket.....	5 00
Graduation Fee.....	25 00

BOARDING

Good Boarding and rooms can probably be had in Cincinnati at less price than in any other large city in the United States. The cost need not be more than from \$4.00 to \$5.00 per week. Where several students club together, as is sometimes done, rent a room and board themselves, the expence can be made less.

Students, on arriving in the city by rail or river, can take an omnibus or express, which are always to be conveniently had, and with their baggage, direct to be taken immediatly to the College, 164 George street, between Smith and John. At the College they will be aided in procuring suitable places of boarding.

TIMES OF LECTURES

There are held each year two courses of lectures. Each course is a complete course by the Faculty, and each one will be followed by the usual examinations and conferring degrees.

The Fall and Winter Course, the ensuing year, will commence, as stated, on Thursday, October 1, 1874, and terminate the latter part of February 1875; the Spring and Summer Term will commence the first day of March, 1875, and continue until the last of the following June, Students should endeavor to be present at the commencement of a Term, as delay entails disadvantages difficult to overcome.

A preliminary course is held just previous to the Fall and Winter Term—commencing September 15th,—which Students should endeavor to attend.

Graduates of 1873-74.
